

# About the Editors

**Paul Weimer**

Paul Weimer is an associate professor in the Department of Geological Sciences at the University of Colorado at Boulder and serves as the Director of the Energy and Minerals Applied Research Center. He received his B.A. from Pomona College (Claremont, CA) in 1978 with honors in geology. He received his M.S. in geology in 1980 from the University of Colorado at Boulder and his

Ph.D. from The University of Texas at Austin in 1989. During the summer of 1978, he worked as a geologist with Amoco Production Company (Denver, CO). From 1980 to 1984, he worked as an exploration geologist with Sohio Petroleum Company (San Francisco, CA) doing regional exploration of the North Slope of Alaska. He worked with Mobil Oil Corporation (Dallas, TX) as a research and exploration geologist from 1988 to 1990. He co-edited four other volumes: *Alaskan North Slope Geology* (SEPM-Pacific Section), *Seismic Facies and Sedimentary Processes of Submarine Fan and Turbidite Systems* (Springer-Verlag), *Siliciclastic Sequence Stratigraphy* (AAPG Memoir 58), and *Submarine Fans and Turbidite Systems* (SEPM-Gulf Coast Section). He has authored more than 50 papers.

Paul's research interests are in applied sequence stratigraphy and basin analysis, petroleum geology of turbidite systems, 3-D seismic interpretation, and reservoir geology. He received the 1992 J. C. "Cam" Sproule Award from the AAPG. He is a member of AAPG, SEPM, GSA, EAPG, and several other professional societies.

**Thomas L. Davis**

Tom Davis is currently Professor of Geophysics at the Colorado School of Mines (CSM) and Director of the Reservoir Characterization Project. He began his career in geophysics at the University of Saskatchewan in the late 1960s as a singular student in the geophysics option of the geological engineering program. Following graduation with a B.E. in 1969, he went on to complete an M.S. in geophysics at the

University of Calgary (1971) and a Ph.D. at Colorado School of Mines (1974). His career in the oil patch began when he worked as a summer hire for Amoco (1968) and Chevron (1969–1970) and then as a permanent employee of Amoco (1971–1972).

Except for a 3<sup>1</sup>/<sub>2</sub> year sojourn to the University of Calgary (1977–1979), Tom has been a faculty member of the Department of Geophysics at the Colorado School of Mines since 1974. He is dedicated to his students and currently teaches courses on seismic interpretation and integrated exploration and development. Since 1980 he has team-taught integrated, multidisciplinary courses at Mines. Having dedicated his career to education and research, he still takes time to consult and lecture worldwide and to watch the wheat grow in Saskatchewan.

Tom joined SEG in 1971 and has taught extensively in SEG's continuing education program from 1980–1994. He served as Second Vice President during 1989–1990 and was SEG's Spring 1995 Distinguished Lecturer. He is a member of the European Association of Geoscientists and Engineers, AAPG, and a host of other professional societies.
