# Table of Contents

## Introduction and Acknowledgments
- iii

## About the Author
- iv

## Section 1: The Production Geologist and the Reservoir
- 1. The Role of the Production Geologist
- 2. Drilling a Well
- 3. The Reservoir Life Cycle
- 4. Reservoir Fluids
- 5. Factors Influencing Recovery from Oil and Gas Fields
- 1

## Section 2: The Geological Scheme
- 6. Sources of Data
- 7. Rock and Fluid Properties
- 8. Maps and Cross Sections
- 9. Predicting the Geology in the Gaps Between the Wells
- 10. The Reservoir Framework
- 11. Lithofacies Maps
- 12. Analysis of Rock Properties
- 13. Structural Geology: Faults
- 14. Structural Geology: Fractures
- 47

## Section 3: Flow Geology
- 15. Production Data and Layering
- 16. Areal Compartments
- 17. Methods for Analyzing Areal Sweep
- 18. Drainage Cells
- 129

## Section 4: Reservoir Modeling and Geostatistics
- 19. Geostatistical Methods
- 20. 3-D Geocellular Modeling
- 21. Volumetrics
- 22. Reservoir Uncertainty
- 23. Interaction with Reservoir Engineers
- 157
