

AAPG Studies in Geology #54:Energy: A Historical Perspective and 21st Century Forecast

TABLE OF CONTENTS

Chapter 1: Introduction, Brief History, and Chosen Approach

Chapter 2: Human Population and Energy Consumption: The Past

Chapter 3: Human Population and Energy Consumption: The Future

Chapter 4: Sources of Energy

Oil

Tar sands: Bitumen and extra-heavy-oil deposits

Natural gas

Coal

Oil shales

Nuclear power

Hydroelectric power

Geothermal energy

Energy from the sun, the wind, and biomass

Hydrogen and fuel cells

Chapter 5: Electricity: Generation and Consumption

Chapter 6: Energy Consumption and Probable Energy Sources During the 21st Century

Appendix Tables
