

Table of Contents

Treatise of Petroleum Geology Advisory Board	ix
AAPG Foundation Treatise of Petroleum Geology Fund	xi
Preface to the Handbook of Petroleum Geology	xii
Preface	xiii
Dedication	xiv

1 Developing a Philosophy of Exploration

Edward A. Beaumont, Norman H. Foster, Richard R. Vincelette, Marlan W. Downey, and James D. Robertson

The art and science of exploring for oil and gas	1– 4
Characteristics of oil finders	1–12
Leading and managing explorationists	1–21
Applying the scientific method to petroleum exploration	1–26
Analog exploration	1–32

Part I

Traps, Trap Types, and the Petroleum System

2 Classification of Exploration Traps

Richard R. Vincelette, Edward A. Beaumont, and Norman H. Foster

Classification philosophy	2– 4
How to use the classification scheme	2–13
Details of the trap classification scheme	2–19

3 Petroleum Systems

Leslie B. Magoon and Edward A. Beaumont

Defining a petroleum system	3– 4
Examples of two petroleum systems	3–14
Applying the petroleum system concept	3–24

Part II

Critical Elements of the Petroleum Province

4 Sedimentary Basin Analysis

John M. Armentrout

Basin framework	4– 5
Depocenters	4– 22
Depositional sequences	4– 30
Depositional systems tracts	4– 45
Minibasins and petroleum systems	4– 78
Summary and exploration strategy, deepwater sands	4–107

Table of Contents, continued

Part II (continued)

5	Formation Fluid Pressure and Its Application	
	<i>Edward A. Beaumont and Forrest Fiedler</i>	
	Pressure regimes	5– 4
	Using pressures to detect hydrocarbon presence	5–11
	Predicting abnormal pressures	5–36
	Pressure compartments	5–44
	Capillarity and buoyancy	5–53
	Hydrodynamics	5–57
6	Evaluating Source Rocks	
	<i>Carol A. Law</i>	
	Source rock basics	6– 4
	Evaluating source rock richness	6– 7
	Evaluating source rock quality	6–16
	Evaluating source rock maturity	6–21
	Relationships between maturity and hydrocarbon generation	6–33
7	Migration of Petroleum	
	<i>Martin D. Matthews</i>	
	Migration concepts	7– 4
	Mechanisms of migration	7–12
	Changes in hydrocarbon composition during migration	7–18
	Migration pathways	7–22
	Calculating migration rate and charge volume	7–29
8	Oil–Oil and Oil–Source Rock Correlations	
	<i>Douglas A. Waples and Joseph A. Curiale</i>	
	Introduction to correlations	8– 4
	Data used in correlations	8–12
	Case histories	8–54

Part III

Critical Elements of the Trap

9	Predicting Reservoir System Quality and Performance	
	<i>Dan J. Hartmann and Edward A. Beaumont</i>	
	Reservoir system basics	9– 4
	Classifying pore systems	9– 17
	Pore–fluid interaction	9– 26
	Water saturation	9– 44
	Predicting reservoir system quality	9– 74
	Examples of petrophysical evaluation	9–125

Table of Contents, continued

Part III

(continued)

10	Evaluating Top and Fault Seal
	<i>Grant M. Skerlec</i>
	Evaluating fault seal 10– 4
	Evaluating top seal integrity 10–45
	Evaluating intact top seal 10–64
11	Predicting Preservation and Destruction of Accumulations
	<i>Alton A. Brown</i>
	Basics: destructive processes and age 11– 4
	Spillage 11– 6
	Leakage 11–13
	Petroleum destruction 11–21

Part IV

Predicting the Occurrence of Oil and Gas Traps

12	Interpreting Seismic Data
	<i>Christopher L. Liner</i>
	Seismic primer 12– 4
	Identifying seismic events 12–12
	Interpreting structure 12–19
13	Interpreting 3-D Seismic Data
	<i>Geoffrey A. Dorn</i>
	Basics of interpreting 3-D seismic data 13– 4
	Stratigraphic interpretation techniques of 3-D data 13–16
	Attributes 13–20
	Visualization techniques for 3-D data 13–23
14	Using Magnetics in Petroleum Exploration
	<i>Edward A. Beaumont and S. Parker Gay, Jr.</i>
	Magnetic basics 14– 4
	Interpreting magnetic data 14– 8
15	Applying Gravity in Petroleum Exploration
	<i>David A. Chapin and Mark E. Ander</i>
	Applying general gravity methods 15– 4
	Applying borehole gravity methods 15–15
16	Applying Magnetotellurics
	<i>Arnie Ostrander</i>
	What is magnetotellurics (MT)? 16– 4
	What does an MT survey measure? 16– 5
	How are MT data acquired? 16– 6
	Case histories 16– 8

Table of Contents, continued

Part IV (continued)

17	Applied Paleontology
	<i>Robert L. Fleisher and H. Richard Lane</i>
	Paleontology and microfossils 17- 4
	Sample collection and treatment 17-14
	Stratigraphic and geographic distribution of fossils 17-20
	Applications 17-27
	New directions 17-47
18	Surface Geochemical Exploration for Petroleum
	<i>Dietmar Schumacher</i>
	Principles of surface geochemical exploration 18- 4
	Designing surface geochemical surveys 18-11
	Case histories 18-20
19	Value of Geological Fieldwork
	<i>Denise M. Stone</i>
	Why conduct geological fieldwork? 19- 4
	Necessary considerations 19-20
	Some thoughts about geological fieldwork 19-40
20	Exploring for Structural Traps
	<i>R.A. Nelson, T.L. Patton, and S. Serra</i>
	Basic structural approach 20- 4
	Structural interpretation techniques and tools 20-16
	Workflow to find a prospect 20-40
	Project planning: The one-minute structural play for managers 20-60
21	Exploring for Stratigraphic Traps
	<i>John C. Dolson, Mike S. Bahorich, Rick C. Tobin, Edward A. Beaumont, Louis J. Terlikoski, and Michael L. Hendricks</i>
	Stratigraphic trap basics 21- 4
	Sequence stratigraphy 21-11
	Geometrical analysis 21-22
	Facies analysis 21-34
	Basin-fill and trap analysis 21-49
	Diagenetic modifications of stratigraphic traps 21-60
